

Project Demo Planning

Date	03 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the **Credit Card Approval Prediction** system effectively by explaining the project objectives, machine learning models, Flask web application, and live prediction process. The demonstration highlights how the system automates credit card approval decisions using applicant financial and demographic information.

.No	Demo Section	Description S	Duration (mins)	Responsible Member
1	Introduction	Introduce the project, objectives, problem statement, and the need for automated credit card approval prediction.	2	Member1
2	Dataset & ML Model	Explain the dataset, data preprocessing, feature engineering, and the machine learning algorithms (Logistic Regression, Decision Tree, Random Forest, and XGBoost).	3	Member2
3	Flask Application	Demonstrate the web interface where users enter applicant details and submit the credit card application.	3	Member3
4	Live Prediction	Show real-time credit card approval/rejection prediction using sample applicant details.	3	Member4
5	Project Architecture	Explain the overall workflow including data preprocessing, model training, Flask integration, and IBM Watson Machine Learning deployment.	2	Member5
6	conclusion	Summarize the project achievements, performance results, and discuss future enhancements.	2	Member1

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for an AI-based credit card approval prediction system that reduces manual effort and improves decision accuracy.
2	Solution Overview	Describe the dataset, preprocessing, feature engineering, machine learning models, Flask application, and IBM Watson cloud deployment.
3	Live Feature Demonstration	Demonstrate user input, model prediction process, and instant credit card approval or rejection result.
4	Q&A Session	Answer questions related to machine learning algorithms, model performance, Flask application, IBM Watson deployment, and future improvements.
